

To Whom May Concern

Paynter Dixon Qld recently engaged Brady Contracting Qld Pty Ltd to undertake the Hydraulics contract, on a refurbishment project at the University of Queensland.

The project involved 3 building over multiple floors. Brady Contracting undertook all the new amenities, new kitchens and upgrade of the existing fire service.

We found Brady Contracting very easy to work with on this project. They resourced the project well, and they completed their works as per program. They did not seek variations unless we requested additional work that was not scoped.

Brady Contracting would advise if there was an issue but always had a solution to the problem.

We found their quality of work to be very good and any defects that have occurred to be rectified in a timely manner.

I have no hesitation in recommending Brady Contracting for future works for our company.

Yours faithfully
